

Scientific poster deliverable: 25% (individual mark)

Context

Imagine you have been asked to attend a conference for Engineering Apprentices in London at the Alan Turing Institute.

Content + structure

Make an A3 poster on your work in your company: the project you are working on *or* will be working on (if you haven't started yet).

You should include:

- ✓ A brief introduction of the company and your role/position in the company
- ✓ Details of your project
 - Background context
 - Missing gap
 - Aim
 - Methodology + Results
 - Conclusion (future studies, implications and value of work)

Don't worry if you haven't started your project, or don't have any results yet – concentrate on the context/gap/aim/methods. You can still make some projected conclusions even if you haven't finished your project.

If you are involved in multiple projects, that's fine – communicate these to the reader.

Resources

Please refer to the documents on Moodle in the 'Scientific Posters' and 'Scientific English' sections.

The assessment grid + guidelines are also on Moodle. Please follow the guidelines carefully.

Deadline for feedback 16/01/2024 23:59 (ppt or pdf). Upload to Moodle.

Deadline for poster deliverable 01/02/2024 08:00 (ppt or pdf). Upload to Moodle.
